Letter of Support for Violetta Liszka

Violetta Liszka successfully completed the degree of Master of Arts in Photography at the University of Brighton in 2018. The course supports students to explore the creative possibilities of photography in the context of the visual arts. All practice modules support students to research including a project proposal demonstrating potential to carry out planned projects towards resolution.

Within projects, students contextualise their work with reference to historical and contemporary case study examples. Questions of technologies and aesthetics are considered to address changing cultural understandings of photographic practice and communicate to audiences through inclusive activities that involve public exhibitions and events. The course effectively prepares students for further public project art work and research studies. I was a tutor to Violetta during both undergraduate and postgraduate studies and have known her for nine years. The coursework Violetta carried out demonstrated imagination and creativity. She has academic strengths and is fluent in spoken and written English language.

I am pleased Violetta is applying for support from Arts Council England National Lottery Project Grant. The proposed project seeking support through application is in my view effectively considered, planned and researched with multiple partners situated in different connected places. Furthermore, the project has good potential for meaningful impact and successful outcomes. Violetta is a motivated artist with independence, team working abilities and resourcefulness. Therefore, I fully support Violetta's application.
